---

Disposal only would be roughly 80K at Veolia where the entire T&D package into Lonestar is 54K. I contacted our commercial group yesterday about getting Lonestar up and running. I explained the urgency. Hopefully they got it ☺. Clean Harbors is already a go for them so I am starting the process with South Tank 1 and 6 as long as that is ok with you. Let me know.

Thanks,

**Beth Crawford**

**Beth:**

**I talked to Leroy today about this. I assume that this is way more expensive than having Lonestar handle. Please confirm and lets get on with it. I think we were going to see if this could be something Amandeep could handle with TCEQ if the timing is quick.**

**Subject:** Re: FT1004

Hi Beth,

As mentioned in our phone conversation, we received word back from the lab at Veolia PTA - Frac Tank 1004 will have to be fed via direct injection (DI). Due to high Sodium (1.4%), Sulfur, Odor and a positive Sulfide screen they are unable to blend the material in our main tanks.

The price for disposal is \$0.53/lb. with a \$5,500.00 minimum per load. The line this material will need to be fed on is booked solid coming out of our turnaround. The first available slots will be in mid March. David is sending the sample data to our sister incinerator in Sauget, IL. They may have the potential to receive loads much sooner.

Also, we are following up on the COI today as well.

Thanks,

Carson

Carson and/or David,

Was the lab able to get through the sample for FT1004? Will this material be blendable? I need to put my finger on some costs here so we can move forward with decisions on disposal.

Thanks,
